#### **DETAILED ACTION**

### **Election/Restrictions**

- 1. Applicant's election without traverse of Claims 15-22 in the reply filed on March 8, 2007 is acknowledged. However, product claims 15-22 were improperly restricted in the previous Office Action, and therefore that restriction requirement is withdrawn. A new restriction requirement is set forth below.
- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. A MEMS device, classified in class 257, subclass 414. Invention I contains claims directed to the following patentably distinct species:
    - A. Fill port with an internal tapered channel locking feature (fig. 5; claims 2-5, 7, 24-29 and 44-47).
    - B. Fill port with an internal stepped channel locking feature (fig. 7; claims 2-4, 6-7, 24-27, 30, 31, 44-46 and 48).
    - C. Fill port with an external island locking feature(s) (fig. 10; claims 8- 11, 14-17, 18, 21-23, 49 and 56).
    - D. Fill port with an external tortuous path locking feature (fig. 9; claims 8-9, 12, 13, 17, 19, 20 and 50).
  - II. Claims 51-53, drawn to a method of sealing a MEMS device, classified in class 438, subclass 51.
- 3. The inventions are distinct, each from the other because of the following reasons:

Application/Control Number: 10/775,517

the adhesive into the package.

Art Unit: 2891

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make another and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another materially different method such as sealing the package using the

Page 3

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

same temperature to fill the fluid and to apply the adhesive, and pumping to draw

- 4. Species A & B and C & D are independent or distinct because they are mutually exclusive and are not disclosed as being used together, or can have a materially different design, mode of operation, function, or effect; e.g., only one type of fill port (external or internal) is disclosed as being used in the package. Species A and B are independent or distinct because only one type of locking feature is disclosed with the internal port (tapered or stepped). Species C and D are independent or distinct because only one type of locking feature is disclosed with the external port (tortuous path or islands).
- 5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic

Application/Control Number: 10/775,517

Art Unit: 2891

claim is finally held to be allowable. Currently, claims 1, 24, 32-43, 54 and 55 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

6. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence

.... 2011101 2031

now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

#### Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven J. Fulk whose telephone number is (571) 272-8323. The examiner can normally be reached on Monday through Friday, 9:30am to 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Bill Baumeister can be reached on (571) 272-1722. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

9. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
